Re: OWENS COMMUNICATIONS

We very pleased to recommend the excellent professionals at OWENS COMMUNICATIONS based on their outstanding performance. In my capacity as Lasco's Vice President I worked very closely with Owens Communications project team from preconstruction through construction. Their "can do" attitude is very much appreciated by our team, both in preconstruction and operations.

Throughout the evolution of the project, Owens Communications was ready and willing to help either through cost savings suggestions, schedule, or manpower in order to make all of our project successful.

We would recommend them without reservation on any project of any size.

Sincerely,

Chris Seely  
Vice President
