Nicholas Harroz III, CPA
President

February 2, 2015

To Prospective Clients of Owens Communications, LLC,

Mark I Asset Management, Ltd. has employed Owens Communications on several projects over the past two years and always experienced exemplary results. Their service started with upgrading our NEC phone system to the newer SL1100 system, programming my wife's company's NEC phone system, and then installing an access control door device to secure our facility.

Owens Communications have always responded quickly, been proactive in their approach, and in the end have completed their work in an exemplary fashion. They have delivered improved technology and impacted our business in a positive way. For example, the NEC Desktop Client allows me to dial from my contacts in Outlook and have the call "pop up" on my telephone for outbound phone calls.

With this in mind I would gladly refer my clientele and friends to use Owens Communications.

Sincerely,

Jerry W. Plant, CFA
Chairman
