To Whom It May Concern:

When our company moved to a new facility, we didn't know who exactly to select for our telecommunications service provider – we just knew we didn't want the same company we had used in the past. We were actually referred to Owens Communications by a representative from a large local cable provider who had heard of their stellar reputation. One phone call and we were taken care of from start to finish.

Owens Communications and its President, Kirk Owens provided very timely service and have always been quick to respond to any questions we had. They not only installed our new NEC system, but tied everything together seamlessly (e.g. Voice to email, video surveillance, etc.).

I would use them again with no hesitation and would highly recommend them to anyone else looking for fast response time, quality equipment and a commitment to customer service that is hard to find these days.
