

To Whom It May Concern,

The Oklahoma Association of Health Care Providers (OAHCP) recently chose Owens Communications to install our new phone system at our corporate headquarters in Oklahoma City.

The experience has been a fruitful and refreshing one. As a result of our choice not only did we get a new NEC phone system that performs very well and gives us the added benefit of seeing our voicemails show up in our emails (pretty cool), but we were also able to offset the cost of the phone system.

Owens Communications found several unused phone lines in their evaluation process of our needs. This finding resulted in OAHCP being able to eliminate about 6 phone lines saving us over \$250/month.

In addition, they helped us identify Cox Communications as a strong phone company to use which saved us even more money. In the end, we now have a superior phone system with much lower operating costs for both equipment and phone company services.

OAHCP would recommend Owens Communication for its superior service and products.

Sincerely,

**Rebecca Moore
Executive Director
Oklahoma Association of Health Care Providers**
