To Whom It May Concern,

Owens Communications recently put in our new NEC phone system. We needed the product quickly as our previous system had been destroyed in one of our Oklahoma Spring storms. The experience was fast and pleasant.

The staff hit the ground running, had the equipment on site the next day, and had installation in that same working day. Staying after hours to make sure we were ready for the next working day was much appreciated.

Programming our emergency after hours routing was seamless as was the instructions in programming to make changes as needed with our rotating staff.

Overall, we have been very pleased with the NEC functionality and Owens Communications installation and follow up.
