iPECS-LIK

Simply Unifying
for SMB
Communications

In a connected world, your SMB communications solution should be simple and powerful with less investment, apparent as their workforce becomes mobile, global, and dependent on ease of communications and collaboration. For the business to perform and stay competitive, regardless of size, enterprises need tools that interoperate well together and bring fast, well informed, critical decision making that facilitates faster, more efficient performance in the work environment.

PRODUCTIVITY ENHANCEMENT OF YOUR BUSINESS WITH UNIFIED COMMUNICATIONS

As an SMB, you need to constantly improve business productivity. Ericsson-LG iPECS-LIK is the core platform of Unified Communications which enhances business productivity with easy communication and collaboration tools. iPECS-LIK brings various applications and communication tools together so you can easily work and serve your customers effectively.

The iPECS UCS Client is an intuitive desktop and mobile collaboration application designed for SMB users so they can easily collaborate with colleagues. Wherever you are, you are able to reach the resources needed for efficient communications. With the click of your mouse, iPECS UCS Client instantly accesses shared resources such as a central company phonebook. Use the presence information reduce communication latency and communicate with others in the most appropriate format, Instant Message, Voice call, video conference, SMS and more.

Share applications and files to review the latest information such as sales records and improve decision making and response time. iPECS UCS simplifies your business communications and improves productivity by linking voice and other communications aware applications under a single intuitive user interface.

LOWER TCO AND COMMUNICATION EXPENSES

Ericsson-LG has been focusing on small had medium-sized businesses more than 40 years and this experiences are reflected to products and solutions. iPECS-LIK which is the best communication for SMB helps you to save money and lower costs. iPECS-LIK employs a fully distributed modular architecture to deliver all the advantages of VoIP. The single voice/data infrastructure significantly reduces the costs of managing your communication solution. The modular type gateways, terminals and soft clients can be put anywhere there is access to the network. Powerful redundancy capabilities assure operation should failure occur with back-up power and Call Server modules.

iPECS intelligent management permits a highly versatile interface to save management time and costs of all iPECS solutions in a distributed environment. Multi-party audio and video conference through the system means there's no longer a need for expensive, third party conferencing services.

EASY TO USE AND MANAGEMENT

When you add a new employee, move phones, set a road worrier or deploy a new branch office, iPECS-LIK always make it simple.

Due to the simply straight-forward configuration and plug and play installation, IT Manager appreciate the ability to locate iPECS solutions where they are needed without clumsy and difficult configuration limits. Managers can monitor and manage up to 500 Call Servers from a single remote point and have full access to the database and maintenance features of each system from anywhere.

Thanks to the modular hardware and software structure, you can simply add another module to increase the capacity or coverage of service no matter how your business is growing.
